JDQ Residences, 761 Coronado St., Brgy. Hulo, Mandaluyong City, Philippines.

WEB DEVELOPER

Experienced web developer skilled in best coding practices, with a strong passion for software development and a continuous eagerness to learn and adapt to new technologies.

TECH SKILLS

React/NextJs/Typescript

NodeJs

Redux/Redux Toolkit

C#/ASP.Net Core

Entity Framework

MySQL/MS SQL Server/MongoDB

UI/UX in Figma

Ant Design

Shadcn

EXPERIENCES

Commerce One Business Solutions Inc.

Aug 2023 - Present

Web Developer

- **Employee Self Service (ESS)**

Created a Figma UI design and developed the finalized UI using Next.js, Tailwind CSS, and Ant Design. Handled backend and API development with C#/ASP.NET Web API and Entity Framework. Set up tables and stored procedures in SSMS using MSSQL Server, and managed the API integration using Redux Toolkit and Axios.

- **Company Website**

Involved in planning and design of code structure. The project involved UI/UX design in Figma, collaboration with other team members during development, and UI implementation using Next.js, Tailwind CSS, and Shadcn. React Email and Nodemailer were set up to handle email forms, and Server Actions were created to fetch data from the Strapi CMS API, ensuring smooth integration with Strapi CMS.

OTHER PROJECTS

Information Management System - Supply and Procurement

Assisted in the implementation and development of the project. Developed features and fixed bugs encountered during development. Created test cases for the project workflow. Familiar with project methodologies such as Agile and Scrum. Participated in daily stand-ups and scrum updates.

Simple E-Commerce Web app

Developed a simple e-commerce website allowing users to register, log in, browse products, and add items to their cart. Admins can add new products. The project is deployed on Vercel. Integrated PayPal for payments, though the integration is not fully functional yet.

Mini Inventory System

Developed a full-stack inventory system using the MERN stack, allowing users to perform CRUD operations on items. The server side is built with Node.js and the Express framework, with data stored in a MongoDB database and fetched on the frontend using Axios. Users can create accounts and manage their own inventories.

Simple Todo App

Developed an app that has basic CRUD functionalities where you can Create, Update, Delete, and Display todos. You can also filter todos based on active todos and completed todos. It has also light and dark mode theme.

EDUCATIONS

College - Bachelor of Science in Computer Engineering

2018 - 2023

Eulogio 'Amang Rodriguez Institute of Science and Technology

Senior High School - Information Communication Technology

Majors: Animation and Computer Programming

2016 - 2018

Krus Na Ligas High School

CERTIFICATIONS

Back-End Web Development with

.NET - LinkedIn Learning

Building Web APIs with ASP.NET

Core 8 - LinkedIn Learning
